

USC

CENTER FOR TRAUMA, VIOLENCE & INJURY PREVENTION

## Seminar Speaker Series

**Albert King, PhD**

**Distinguished Professor, Wayne State University**

### **Injury Biomechanics Research – The role of engineers in the protection of human lives**

Dr. King will present a historical overview of how engineers have improved safety systems such as airbags, helmets and protective gear for over 75 years. Advances in the prediction and prevention of TBI will be presented as well as other research areas such as facet joint pain and traumatic aortic rupture. Both computer modeling and experimental research will be presented.

**Aresty Auditorium**

**Health Science Campus**

*Inside the Kenneth Norris Jr. Comprehensive Cancer Center & Hospital, Level LG*

**November 13<sup>th</sup>**

**1:30 pm to 2:30 pm**

Please RSVP at [CTVIP@usc.edu](mailto:CTVIP@usc.edu)
